CAMELOT 3PL COMPANION

by WB WarehouseBridge

FOR CAMELOT EXCALIBUR USERS

See your whole warehouse, and every client, at a glance.

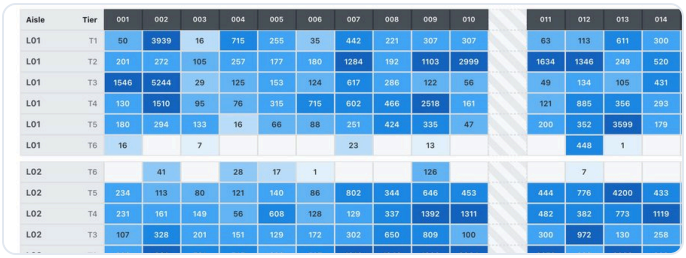

The Companion reads the data already in your Camelot system and turns it into live screens for the floor, the office and your client reviews.

AS SHOWN AT THE CAMELOT 2026 USER CONFERENCE
CHARLOTTE, NC · OCTOBER 2026

WAREHOUSE HEAT MAP

Know which bins do the work

Every bin colored by picks, inventory or velocity. Work in 2D day to day, switch to 3D to see the whole building, and spot fast movers in the wrong place.

CLIENT SCORECARDS

Know which clients make you money

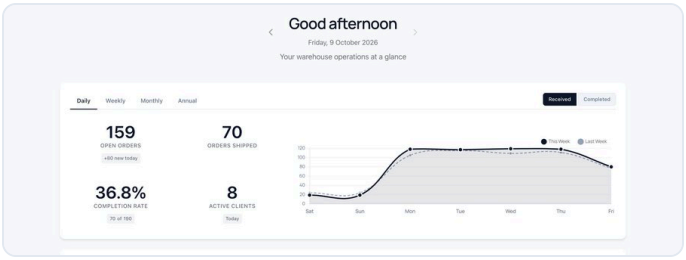

Revenue, orders, stock turns and money owed for every client, side by side, with a one-page scorecard ready for each client review.

TODAY

Know how today is going, right now

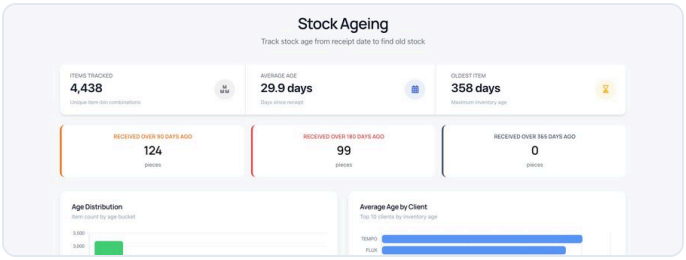

Open orders, orders shipped, completion rate and active clients, with where every order is and your team's busiest hours.

STOCK

Know what's sitting on your shelves

Stock aging by client, how full the racking really is, and where re-slotting would save your pickers time.

See it moving: the one-minute overview

Scan the code, or go to **warehousebridge.com/video**. Narrated, with captions. Videos on the heat map and client scorecards are overleaf.

Screens show the Companion demo warehouse, with sample data.

WHO IT HELPS

Something for everyone who runs the building

Owners and general managers

Which clients are profitable and growing, and a scorecard to take into every client review.

Operations

Where the picking happens, whether fast movers sit in the right place, and which stock is aging.

Warehouse managers

Today's orders and where each one is, plus the busiest hours and days of the week.

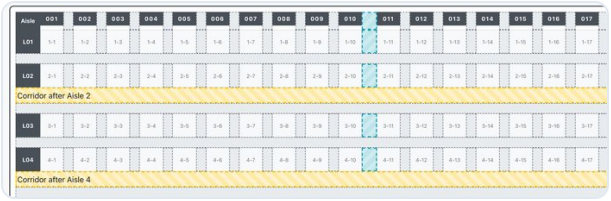

Finance

Revenue by client and by charge type, and what each client owes.

WILL IT WORK FOR MY WAREHOUSE?

Yes. It is set up around your building.

1. **We map your layout with you**
   Aisles, sections and tiers go onto the grid as they sit on your floor, with corridors where yours are.
2. **Every location**
   Run more than one site? Switch between them from the top bar. Each has its own map.
3. **Connected to Camelot**
   Picks, stock and clients come across automatically. The Companion only reads your data, so nothing in Camelot changes, and it runs in a web browser with nothing to install.

ALSO FROM WAREHOUSE BRIDGE

Pick-to-light and put walls

Lights show pickers the right location and quantity. We ran it live in the Experience Center at the conference, picking orders from Camelot's demo system. Ask us for the pick-to-light fact sheet.

WATCH

Three short videos, about a minute each

The overview
The whole Companion, 1 min
warehousebridge.com/video

The heat map
2D, 3D and filters, 1 min

NEXT STEP

Ask your Camelot account manager about the Companion.

Which screens you get

The heat map works with every version of Excalibur. Other screens depend on your Excalibur version and subscription.
